Notes

O
The minimum volume of water that can be purchased is m3.
Once purchased volumes have been drawn, customers need to purchase additional water via the Water & Waste Operations Administrator.
If permit holders lose their Smart Cards, the cost of a replacement card will be charged to the customer in line with Council fees and charges. The cost is currently \$40 (incl GST).
Please refer to the Council Fees and Charges for bulk water and annual administration charges.
Clutha District at present has one Filling Station located at the Balclutha Water Treatment Plant, 28 Crown Street, Balclutha.
Only Taumata Arowai approved water carriers can access the filling station for drinking water supply purposes. Details can be found on Taumata Arowai's website: <https://www.taumataarowai.govt.nz/for-water-suppliers/for-water-carriers/>.

\
your application was approved. If approved, you will be invited to attend an operational briefing before you are provided an access card. Your access card will give you access to water collection points. You will pay for water. Payment is in advance - you will need to have it topped up before you can use it.
