## **Milton Main Street Upgrade Submission**

### **Undergrounding Power**

**Option 3** from Mill Street to Abercrombie Street, my preferred option.

Dream Big! Consider undergrounding from Bridge to Bridge or from the South Bridge to the Four Square Corner (Kink in the road)

### **Landscaping**

If shops can't be seen, passing traffic will not stop. Restrict plantings to the re-development of the Stewart Reserve, the approaches to the town and perhaps at the 'Kink' which currently has large paved areas which may be able to be planted without restricting vision.

Consider installing low level decorative elements such as laser cut panels, sculptural bollards, decorative footpaths etc to other areas. This would retain the desired openness of the street and also reduce the cost of ongoing maintenance required by the Council

### **No loss of main street parking**

The Milton community is not large enough to sustain our retail sector so passing traffic is essential for its survival. If those passing through cannot find a park on the main street, they will not stop.

### **Additional parking**

Additional on-street parking in Gray Street would be welcomed but maybe there is also an opportunity to provide extra angle parking in Eden Street by removing the large berm on the North side.

Consider providing EV charging station(s) at Stewart Reserve for both cars and bicycles.

### **Positioning of Toilets**

It was suggested that the toilets back onto Gray Street, but this may cause a safety issue especially at night if the entrance is not visible from the street. Facing either Gray or Union Street would be a safer option.

Tell us: What you think of our plans before 27 April 2021

## Clutha District Long Term Plan

### **Living & Working**

I believe the council should become more involved in providing quality housing, especially to those in need on welfare or homeless.

These could be in the form of apartments, but also provide security and a manager to ensure these people remain safe. Provide support for drug and alcohol issues. Budgeting advice and health services. Enable these people to thrive, hopefully leading to full time employment for most and the ability to provide for themselves and not be reliant on the state.

Which would improve mental health outcomes, reduce family harm and violence and lift the standard of living for everyone.

Sadly our communities are not as safe as they once were, personally my family has had to endure squatters next door, who have stolen from neighbours and local businesses.

My children felt unsafe to make their own way to school. A local pensioner finally got that scared he didn't even sleep in his own house. 20 months later they were finally removed by police, moved on to another community to endure.

We have children and teachers being physically attacked at school, ER doctors being king hit ! I know these abusers need help, but more and more innocent people are suffering.

The safety of the community needs to be reinstated as top priority. Those who selfishly choose to harm others need to be removed from the community to care facilities, where they get help, hoping most can return to be an asset to the community they live, not a monster.

I realize most of these issues need central Government funding, especially health which is massively underfunded and resourced. But the longer these issues are left, the more harm our people will suffer, resulting in more victims.

*Tourism* - This needs to be balanced to ensure visitors get a good experience , and the Catlins doesn't become crowded which has negative effects on both the environment and locals. Brilliant that the Government is finally taking steps to protect the environment by making a fully functioning self contained on board toilet a legal requirement.

### **Water & Environment**

We need to have control over our local resources, central Government have shown that they are not capable of protecting unique environments, stupidly having one set of rules for all, not allowing for variables that climate and location create.

Using a catchment approach to measure the health of the environment would protect the unique aspects of that area, while also ensuring the needs of the human community living within can be met.

An example of this would be the Tahakopa Catchment, which is mostly DOC land, with the remaining area split between forestry and moderately stocked sheep & beef farms.

The water samples taken in the river return healthy readings with a very good MCI count.

But incoming nation wide rules will require all waterways to be fenced off from stock, regardless of water quality or stocking rate. In the Catlins rainforest we have a huge number of waterways, fencing them all is impractical and expensive. Which will sadly lead to farms being sold out to

forestry, resulting in families leaving the valley. Less work for surrounding business, less income for the district. What's positive about this ?

Fencing waterways will change the landscape forever. I know the dream of the government is to have thousands of native plants flourishing and supporting our native wildlife. But unless millions of dollars are spent establishing and ensuring these areas remain weed and pest free. They will become a breeding ground for vermin, and increase the fire risk.

Clutha District Council needs to keep control of our waterways to ensure the best protection for the environment and the people within.

If we lose farmland to trees we lose employment, remember stock properties sell stock each year regardless of the market, as we've seen foreign owned forest companies stop felling trees when prices fall leaving our people without jobs.

## **Infrastructure**

Clutha needs reliable users friendly infrastructure to meet the needs of the locals who use it, it's important that it's maintained to a high standard to ensure it functions as required, efficiency will save money and be beneficial to both the community and environment.

*Roading* - Huge increase in traffic volumes over the last decade, has resulted in many repeat complaints about conditions of our rural roads. Tahakopa is a prime example of this - constant logging operations removing thousands of tonnes of logs yearly, requires a huge increase in maintenance of the road to ensure it's safe for all users. This isn't always the case.

With the massive tonnage using the road, it's important to ensure the road is being dressed with suitable hard wearing rock, and before the road surface breaks through. Also investigate the possibilities of sourcing gravel nearby to save costs, on all maintenance projects.

*Stormwater/sewerage*- Also will need major investment to ensure existing pipes, ponds and treatment plants are satisfactory and are able to cope expanding to new housing and industrial builds, but are important to ensure a healthy population and environment.

*Rural Grey water* - Council needs to ensure that our recent population growth is met with adequate infrastructure to ensure all waste is correctly dealt with.

There has been huge increase in people "living off the grid"

## **Finances**

Don't borrow money unless it's the only option and then only if necessary to provide everyday needs to ratepayers. Rates will sadly have to increase but keep this to a minimum by only spending on essentials.

Simply explain this to ratepayers, you either keep costs down, or have soaring rates and debt. We want a robust District Council which is in a healthy financial situation with functional infrastructure to ensure we can endure whatever lies ahead, otherwise ratepayers and the environment will suffer.

#### FINANCES

What do you think of our proposed mix for spending, borrowing and rating? (Page 10)

Any Comments?

Trust you lot to make the right decision for our wee district re: finances.

#### RATES

What do you think of our proposed approach to keep rates down? (Page 8)

Option 1:

Use reserves to keep rates down in the short term (Council's preferred option)

Option 2:

Don't use reserves to keep rates down in the short term

Any comments?

#### INFRASTRUCTURE

Have we got our priorities right for infrastructure? (Page 5)

How important is:

- Discharges to the Environment
- Stormwater Protection
- Growth in Milton/Milburn/Waihola
- Safer Drinking Water
- Council Housing Improvements
- Mt Coote Landfill
- Efficient Road Maintenance
- Replacing Aging Infrastructure
- Faster Bridge Replacement

#### MILTON

How far should we go and how much should be spent improving Milton's Main Street? (Page 12)

Option 1:

Spend initial budget (Council's preferred option)

Option 2:

Spend \$1.75M more

Option 3:

Spend \$3M more

Any comments?

If we're gonna do it - let's bloody well do it big. I feel the retailers should be listened to regarding the main street.

#### WATER

A better source? (Page 7)

Option 1:

Establish a new supply from the Clutha River (Council's preferred option)

Option 2:

Continue to source water from the Waitahuna and Tuapeka rivers

Any comments?

*Let's talk Kia Korero*

Tell us: What you think of our plans before 27 April 2021

Just submitted on your web site my worry about the high volume of dust generated on our many unsealed roads, making visibility a great problem, especially during our long dry summers.

Feel more pressure needs to be put on our council to tar seal more of our busy unsealed roads, a typical example would be Old Manse Road, Clinton, where the road is used by so many trucks of all descriptions, who used the road as a short cut between SH1 to SH93, instead of going back into Clinton.

Council have said in the past that I could have the section(s) tar sealed at my own expense, but that is far beyond my means. Council need to be forward thinking and get busy and tar seal these busy roads, to increase the safety of all road users and reduce the amount of dust floating around when these roads are used often. They should also be asked to impose a speed limit of 50 Kph on all unsealed roads irrespective of where located.

Another problem that should be raised is the number of homes who have broken/unusable multiple cars stored in their gardens, that have been there for many years, that makes the general appearance of the area poor. Request that the council make contact with such home owners and get those unusable cars/trucks removed from their gardens to a scrap dealer to tidy the place up.

Lastly also noted that throughout the district one comes across old broken & abandoned homes just left to decay even further, and making the town look down trodden and unwanted. Feel the council need to contact the owners and get them to either make the homes usable again or removed so as to improve the appearance of the district. A typical example would be Clifford Street here in Clinton They are not the only ones within Clinton.

**FINANCES** Any Comments?

What do you think of our proposed mix for spending, borrowing and rating?  
Rates & borrowing need to increase. Lets get off the treadmill & get the region going forward.

How could we improve the mix? (Page 10)  
Increased spendy on infrastructure & roading is overdue.

Efficient Road Maintenance							<input checked="" type="checkbox"/>
Replacing Aging Infrastructure							<input checked="" type="checkbox"/>
Faster Bridge Replacement					<input checked="" type="checkbox"/>		

Any comments?  
Roading needs an increase in spending. Its substandard & dangerous in places.

**RATES** Option 1:

What do you think of our proposed approach to keep rates down? (Page 8)

Use reserves to keep rates down in the short term (Council's preferred option)

Option 2: Don't use reserves to keep rates down in the short term

Any comments?  
Rates need to increase! We need developed infrastructure.

**MILTON** Option 1:

How far should we go and how much should be spent improving Milton's Main Street? (Page 12)

Spend initial budget (Council's preferred option)

Option 2: Spend \$1.75M more

Option 3: Spend \$3M more

Any comments?  
Do it properly the first time! Need to be business friendly

**WATER** Option 1:

A better source? (Page 7)

Establish a new supply from the Clutha River (Council's preferred option)

Option 2: Continue to source water from the Waitahuna and Tuapeka rivers

Any comments?

Filling Jobs	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Any comments?

We need good housing here in MILTON. NEW Complexes for elderly. This will free up bigger/older homes for redevelopment if it can.

#### FINANCES

Any Comments?

What do you think of our proposed mix for spending, borrowing and rating?

Smaller amounts to the less important works. Spend where we need it. ie. smartening / freshening up our main street. NOT!! Trees. Just tidy it and the footpaths / roads.

How could we improve the mix? (Page 10)

#### RATES

Option 1:

What do you think of our proposed approach to keep rates down? (Page 8)

Use reserves to keep rates down in the short term (Council's preferred option)

Option 2:

Don't use reserves to keep rates down in the short term

Any comments?

Always a proposal but will not ever change the fact it goes up every year. Just use this extra on "important" issues.

#### INFRASTRUCTURE

Faster Bridge Replacement	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Any comments?

We need to get the Basics correct first and foremost.

#### MILTON

Option 1:

How far should we go and how much should be spent improving Milton's Main Street? (Page 12)

Spend initial budget (Council's preferred option)

Option 2:

Spend \$1.75M more

Option 3:

Spend \$3M more

Have some pride!!

Any comments?

Spend adequate amount to freshen and tidy up. Even the facades, alert owners to tidy up their own windows/roofs etc.

#### WATER

Option 1:

A better source? (Page 7)

Establish a new supply from the Clutha River (Council's preferred option)

Option 2:

Continue to source water from the Waitahuna and Tuapeka rivers

Any comments?

Not sure on this so leave to the experts. Quality has to be good
