

'Our Place'

Community Plan Projects

This guide shares helpful information about the support Clutha District Council can provide to anyone looking to start a community led project.

Key things to think about:

- What is the project trying to achieve?
- Who benefits from the project?
- Where is the project located? Is it council or private land?
- What funding, if any, is required to complete the project?

Council is here to work alongside communities to build strong partnerships, find creative solutions, and work through barriers.

Together, we can turn great ideas into real opportunities.

Council may be able to:

- Assist with funding.
- Provide technical support, including mapping and guidance on consent issues.
- Advocate on behalf of the community for actions or decisions by other agencies.
